

MECHANICAL *Venting*

INTRODUCING THE X-VENTISO SERIES EXCLUSIVELY BY EARTHCORE.

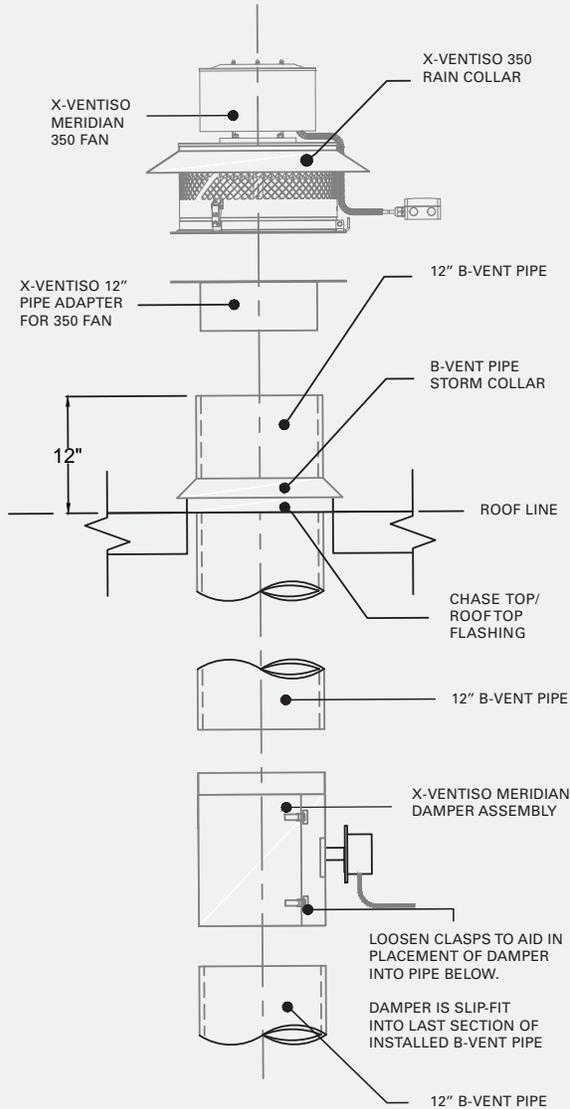

We have simplified and improved mechanical venting for residential and commercial projects. Featuring fully integrated designs and proprietary Molex® quick connections, the X-Ventiso series is the most technically advanced, quietest fan system on the market.

WHY X-VENTISO IS A SUPERIOR VENTING SYSTEM

- The perfect drafting solution where variable airflow in overly insulated homes, commercial spaces, or hospitality venues is a factor.
- Efficient, fully integrated system.
- Capable of supporting the most challenging and unique drafting and venting requirements.
- Exclusive DUO control technology for solid fuel and gas applications where dual fans are required by CFM calculations.
- 120v plug-in power system eliminates an electrician installation as long as there is a 3-prong, 15-amp outlet within 3 feet of the controller location.
- Stainless-steel fan housing and impellers significantly reduces vibration and noise.
- 100% Molex® “plug and pay” quick connections for ease of installation.
- 3 fan sizing options are designed to manage any hearth application or fuel type.
- Simplified controllers manage 98% of all normal installations without customization.
- XV Series fans can be terminated vertically or horizontally at the end of the chimney run.
- UL378 listed and rated to 1000°F continuous heat; and 1400°F abnormal.
- The XV Series Wood Burning controller system is compliant with NFPA 211 audio and visual alarms.

X-Ventiso is the industry's most technically advanced, easy to install, fully modular fan system that includes fans, controllers, dampers and accessories for all solid fuel and gas appliances.

X-Ventiso Meridian system for Maximus Linear shown.

XV SERIES - FANS

The quietest, most advanced fans on the market with 3 model sizes. Triple rated for all fuel types, solid, gas, and grease.

XV SERIES - POWER CONTROL MODULE

Featuring Molex® quick-connect installation replacing rudimentary rheostat devices to control fan power and speed. Available in solid fuel and gas configurations.

XV SERIES - ADAPTER

Adapters are available for all standard chimney flue sizes providing optimum design flexibility.

XV SERIES - RAIN COLLAR

Prevents water and moisture from the elements seeping down into the chimney pipe.

XV SERIES - DAMPER ASSEMBLY FOR GAS APPLIANCES

There is a full selection of in-line top mount dampers for B-Vent and Class-A Chimney flue configurations.
